

SkinPen[®]

by Bellus Medical

THE ONLY **FDA APPROVED** MICRONEEDLING DEVICE

Straight, Sterile & Precise

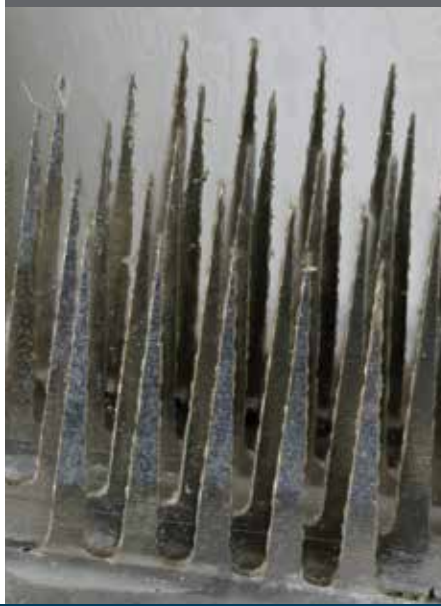

SKINPEN

Hooked Needle*

ADULTERATED DEVICES ON MARKET

Jagged*, Non-sterile Needles**

Protect Your Practice. Protect Your Patients.

SkinPen[®] Precision is the ONLY approved Class II Microneedling Device that has been granted marketing authorization by the FDA. U.S. designed and engineered for excellence and safety in every step:

- Validated sterile cartridge with precise depth, straight needles support the skin's natural healing process, where others may damage the skin.
- The only advanced, medical grade microneedling product on U.S. market with precise and safe needle depth adjustment.
- Laboratory tested, proprietary technology to prevent cross-contamination.

A recent study* found that the SkinPen Precision cartridge was ranked highest in quality when compared with other microneedling cartridges. Making the Precision Cartridge superior was its potential for contamination free operation, and smooth, polished needles.

*Independent research technology company evaluated major brands in the derma microneedling market. Supporting Macro and Micro photographs of each needle and cartridge were generated and each derma microneedle brand examined. Data on File. **Evaluated by independent laboratory. Data on file.

A Category of One.

SkinPen® is the world-class, gold standard in microneedling. Three years of Bellus Medical’s proactive work in design and development has paved the way for a new classification in the microneedling category. Now, SkinPen® is the only legal device with this new classification – *truly a category of one.*

*For complete clinical trial summary and information on how to use the SkinPen Precision microneedling device, visit skinpen.com.

Intended Use: The SkinPen Precision System is a microneedling device and accessories intended to be used as a treatment to improve the appearance of facial acne scars in adults aged 22 years and older.
